2026 FINTECHATHON · SUBMISSION TEMPLATE

Demo Video | Production & Submission Guide

Required for the International AI Track. The video must be no longer than five minutes.

队伍名称 / Team	Team Mongolia, National University of Mongolia: Taivanbat Bayarsaikhan (team leader, Computer Science), Tuguldur Munkhbat (Software Engineering)
参赛赛道 / Track	International AI Track, Topic F: Agent Wallet - Autonomous On-chain Wallet
提交日期 / Date	20 October 2026 (deadline 23:59 UTC+8)

01 Recommended Structure

- Project and team introduction

  0:00-0:31, shots 01-03: animated title and team over a network of agents paying each other; why it matters, animated: a timeline of four reported AI-wallet incidents (Nov 2024 - May 2026), Freysa's case step by step, then our answer (verifiable settlements feed a credit grade that decides pay, escrow or refuse) with our narrow claim; the owner console

- End-to-end demonstration of the core scenario

  0:31-2:33, shots 04-09: owner chat with clarification and correction; mandate M1 registered on-chain; a normal payment; a payment capped by grade; escrow for an unrated provider and a refund; earned promotion; a defaulter's grade collapse, refusal and stolen-key revert. Every hash and explorer page is from the recorded Base Sepolia run; the console views come from a local run of the same scenario and are labelled so on screen

- Safety mechanisms, innovation and results

  2:33-4:57, shots 10-16: a hijacked invoice (the injection detector's flags, the agent's masking and the policy's refusal; no model shown), then a scripted worst-case LLM; demotion; circuit breaker; owner reset with key rotation and maker-checker approval; the attack-suite results for the LLM taken down (A32, rule-based fallback) and a request for the private key (A10); attack-suite and false-positive totals; offline verification; ERC-8004 identities

02 Video Quality

- Use 16:9 landscape and preferably 1080p

  1920x1080, 16:9, 30 fps, H.264

- Make interface text, narration and English subtitles clearly legible

Console crops scaled so its 18 px base font reads at 30 px or more; terminal pages at 22 px or more; one English AI voice (ElevenLabs, voice Matilda) at 112-150 words per minute; English subtitles burned in at 44 px or more, white on a dark box

03 Final Check

- No copyrighted or sensitive material

  No music; no third-party logos other than the block-explorer pages themselves; no keys, tokens, passwords, .env or personal data on screen; counterparties are simulated agents and labelled as such

- Suggested filename: Track-TeamName-DemoVideo

  InternationalAI-TeamMongolia-DemoVideo.mp4
